FLUID MANAGEMENT AFTERMARKET SOLUTIONS

HUTCHINSON®

OEM FLUID MANAGEMENT SYSTEM EXPERTISE FOR THE AFTERMARKET

As a trusted OEM partner to the world's leading vehicle manufacturers, Hutchinson brings its fluid management expertise to the automotive aftermarket.

The range includes air intake, air conditioning, cooling and emissions control systems.

Manufactured to the same demanding standards as original equipment components, Hutchinson solutions deliver outstanding performance, reliability and durability for maintenance and repair professionals.

These solutions are available for conventional and hybrid vehicles.

AIR

Turbocharger inlet pipe

- ▶ Air tightness
- ▶ Functional integration
- ▶ Vibration and heat resistance

Charge air line

- ▶ In-house acoustic design
- ▶ In-house plastic injection
- ▶ In-house rubber compounding

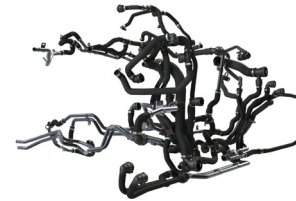

AIR CONDITIONING

Heat pump AC loop

- ▶ In-house rubber hose manufacturing
- ▶ Non-brazed interfaces
- ▶ Integrated heat exchanger

COOLING

Cooling line

- ▶ Combines plastic, rubber, and/or metal
- ▶ Light and flexible solution
- ▶ In-house rubber compounding

Multi-way valve

- ▶ Low internal leakage
- ▶ Pressure loss optimization
- ▶ Compact solution

DEPOLLUTION

EGR (Exhaust Gas Recirculation)

- ▶ Chemical and temperature resistance
- ▶ In-house rubber compounding

Diesel/Gazoline particles filters

- ▶ Chemical and temperature resistance
- ▶ In-house rubber compounding
- ▶ Full set of protective sleeves

SCR

(Selective Catalytic Reduction)

- ▶ Chemical and temperature resistance
- ▶ Full set of protective sleeves
- ▶ Flexibility
